

Brandon Smith

Technical Designer

New York, NY | Bsmith5701@gmail.com | +1 347-469-3385 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

SUMMARY

Technical Game Designer with hands-on experience building scalable gameplay systems, scripting fluid mechanics, and developing custom pipeline tools that empower cross-functional teams. Specializes in treating gameplay architecture as an iterative design problem, utilizing SOLID design principles to bridge the gap between creative vision and robust software engineering. Proven track record of managing feature iteration and system optimization from early prototyping through to public release across Unity and Unreal Engine pipelines.

SKILLS

Languages: C#, C++, Java, Lua

Technologies: Git, Unity, Roblox, Unreal Engine, Trello, Visual Studios, FMOD, VR

Core Competencies: Systems Architecture, Tool Development, Gameplay Balancing, Procedural Generation, Agile/Scrum Development

EXPERIENCE

Charon's Corner ([Steam](#) / [Itch.io](#) - Shipped)

New York, NY

Game Design Lead & Programmer

2025 - 2026

- Led game design across sprints, managing feature evaluation and cross functionality for an 80+ dev studio.
- Engineered a spline-based "Wrong Way" system, calculating real-time player orientation for UI feedback.
- Integrated a coordinate-tracking checkpoint system managing real-time resets to prevent out-of-bounds errors.
- Established a scalable level framework using elevation-shifted splines for rapid, repeatable track layout iteration.

In the Flesh ([Itch.io](#) - Shipped)

Remote

Technical Designer

Nov 2025 - Feb 2026

- Engineered a procedural generation system for a destructible voxel flesh substance that deforms in real-time.
- Built a custom level editor tool to dynamically populate confined map spaces with auto-scaled assets.
- Programmed core extraction mechanics, including a physics-based drill and a timed active-minigame slider.
- Developed omni player controls for seamless, 360-degree navigation through dense organic environments.

Birds of Impalitim ([Itch.io](#) - Shipped)

New York, NY

Technical Designer / Programmer

April 2025 - May 2026

- Developed a custom save/load architecture using JSON serialization and PlayerPrefs across multiple scenes.
- Unified sub-communication layers across progression, collectibles, and world data into modular frameworks.
- Implemented robust safeguards based on SOLID principles to eliminate structural data corruption.

Psycorp ([Steam Wishlist](#) - In Development)

Remote

Technical Designer / Tools Engineer

Dec 2025 - Present

- Created a custom Unity proprietary toolset scene editor to streamline narrative workflows for designers.
- Built a custom editor window system with robust capabilities to safely validate actor placement coordinates.
- Created a multi-tab editor utility to automate the setup of mandatory technical pipelines, cameras, and flags.

Project Dreamscape ([Steam](#) - Shipped)

New York, NY

Enemy Designer

Sept 2024 - Jan 2025

- Balanced and tuned distinct enemy archetypes to establish clear combat roles and encounter pacing.
- Balanced health table, damage, and stagger thresholds to maximize combat readability and response windows.
- Collaborated with QA and design teams to evaluate systemic balance and authored detailed documentation.

EDUCATION

City College of New York

New York, NY

Bachelor of Science in Game Design, 3.5 GPA

June 2026

- Relevant coursework in Game Engines, Game Development, and VR Development.
- Thomas W. Smith Academic Fellowship.
- UAG Award winner for best Visual Design & Most Anticipated Games 2026.
